SCSBIT offers Risk Control Services

- One of the most important ways SCSBIT serves member districts is through its program of risk control.
- Sound risk control strategies are given to districts to help districts to reduce the number and expense of claims while protecting the health and safety of employees, students, and the public.
- Ex. In December 2020, we applied for a grant in the amount of \$11, 712.92. In May 2021, we received \$11,711.98. The grant funds were used to purchase slip resistant floor mats and four “Wet Floor” signs.
