About STEM From Dance

Our communities have traditionally used dance to release, celebrate, draw strength, communicate, and learn. We combine dance with tech to transform STEM careers from unthinkable to within reach and show girls how confidence in STEM subjects can be a way of life just as much as dance.

Girls in our programs work together to choreograph dances, design and build the tech in their performance, and connect with other girls and supportive adults who share their interests. We inspire and encourage our girls to dream big and help them turn their dreams into reality — on stage, in the classroom, and throughout their lives.
